ABOUT ME

Fullstack developer with 1+ year of experience building modern web and mobile applications mainly with React and TypeScript. Data Engineering graduate, focused on creating scalable, maintainable systems - from intuitive user interfaces to robust backend architectures. I'm driven by solving real problems, learning fast, and delivering high-quality solutions in collaborative environments.

PROFESSIONAL EXPERIENCE

ALEATEX | Sep 2025 – Nov 2025

Software Developer

- Contributed to the development of the MVP of the madc.ai platform as a member of a fullstack engineering team on a short-term contract.
- Designed and maintained TypeScript microservices for large-scale ingestion and processing of heavy project artifacts from multiple external sources (Google Drive, Google Calendar, Jira, GitHub, and others).
- Built data pipelines transforming unstructured project data into analytics used to evaluate external project clarity, requirements quality, and execution transparency.
- Implemented backend and frontend features supporting early product functionality and scalable service architecture.

Tech Stack: TypeScript, React, PostgreSQL, Supabase, Kubernetes, gRPC, Rust.

LEOCODE | May 2025 – Aug 2025

Junior Software Developer

- Contributed to the development of the Human Body Universe web application (AnatoMy project) on a contract basis.
- Implemented a metadata ingestion pipeline with associated GLB models into the database.
- Developed frontend features for visualizing and mapping anatomical structures in a 3D environment using Three.js, reducing 3D model loading time by over 30%.
- Implemented a role-based access control system.
- Created a CLI-based validator to check the correctness of model and metadata file structures stored on Google Drive.

Tech Stack: TypeScript, Next.js, C#, .NET Core, Three.js, PostgreSQL, MinIO, Redis, Azure Blob Storage.

ŚWIAT TONERÓW S.C. & TONERICO

Google Sheets & Apps Script Developer

- Designed and implemented a printer service management system used to streamline workflow and data tracking.
- Automated recurring tasks and reports, improving operational efficiency and reducing manual errors.
- Developed custom scripts for data validation, aggregation, and reporting to support business decision-making.

SIUDAK.COM | Oct 2024 – Jan 2025

Backend Developer Intern

- Implemented backend features for the SelfExpo platform using TypeScript and Next.js.
- Implemented functionality supporting self-service pavilion registration workflows.

Tech Stack: Next.js, TypeScript, MongoDB, JWT, Jest, GitHub, REST API.

ITM CODE | Sep 2024

Mobile Developer Intern

- Developed features and reusable UI components for a networking mobile application created for the Kielce Technology Park, completing numerous tickets across frontend and UI tasks.
Tech Stack: TypeScript, React Native, GitLab, CSS.

EDUCATION

Kielce University of Technology

- M.Sc. in Computer Science (Information Systems) | part-time, Feb 2026 – Expected Jul 2027
- B.Sc. in Data Engineering (Data Resource Engineering) | Sep 2022 – Feb 2026

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, Python, Java, C#, SQL
- Frontend: React, Next.js, React Native, HTML, CSS, Three.js
- Backend: Node.js, Express, Fastify, .NET Core, REST API, gRPC
- Databases & Storage: PostgreSQL, MongoDB, MySQL, Redis, MinIO, Supabase
- Tools & Platforms: Git, GitHub, GitLab, Docker, Kubernetes, Azure
- AI-assisted development tools: Cursor, Claude Code, GitHub Copilot
- Data & BI: Excel, Power BI, Power Query, pandas, matplotlib

LANGUAGES

- Polish – Native
- English – Advanced (C1)

PERSONAL PROJECTS

Tutoring Platform | Startup Project | 2026 – Present

- Full-featured tutoring marketplace platform with intelligent tutor search, integrated payments, interactive whiteboard, voice chat, and geolocation. Designed as a scalable product architecture for online and in-person lessons.
Tech Stack: React, Node.js, Supabase, PostgreSQL, Stripe

[Portfolio Website](#) | Personal Project | 2026

- Interactive developer portfolio [sliwski.com](#) featuring custom scroll animations, typewriter effects, and a custom cursor. Focused on performance, UI polish, and modern frontend architecture.
Tech Stack: React, TypeScript, Tailwind CSS, Vite

[Diploma Thesis – Pathological Mass Detection Using Transfer Learning](#) | ML Project | 2025

- Machine learning model for detecting pathological masses in X-ray images using transfer learning techniques and medical imaging datasets.
- Tech Stack: Python, TensorFlow, Keras

[Strength Training Logger](#) | Mobile Application | 2025

- Mobile application for logging strength training sessions with workout planning and progress tracking. Designed data models and backend APIs to support structured training workflows.
Tech Stack: React Native, MongoDB, Fastify, Nativewind

[Cheap Flight Alert System](#) | Desktop Automation Tool | 2024

- Automation system for detecting discounted flights and sending promotional SMS alerts based on price thresholds and route filters.
Tech Stack: Python

[Demographic Factors Analysis – Life Expectancy Study](#) | Data Exploration & Visualization | 2023

- Solo project analyzing the impact of demographic variables on the average life expectancy of men worldwide, including data exploration, visualization, and a detailed report summarizing findings.
Tech Stack: Microsoft Excel (Data Analysis Add-in), Python (pandas, matplotlib)

[Hypertrophy Training Program Planner](#) | Optimization & Data Analysis | 2023

- Solo project creating personalized hypertrophy training plans based on the “stimulus to fatigue ratio” parameter, including optimization of workout parameters, data analysis, and a structured report with recommendations.

Tech Stack: Microsoft Excel (Solver Add-in)
