

GRZEGORZ ŚLIWSKI

FULLSTACK SOFTWARE ENGINEER

Poland, Kielce | grzegorzslowski@gmail.com | slowski.com | [Github](#) | [LinkedIn](#)

I'm a data engineer and developer with over 1 year of experience. I create modern web and mobile applications based on React and TypeScript. I design both frontend and backend, building scalable architectures. Skilled in building APIs based on various communication models.

TECHNICAL SKILLS

Programming

Languages:

Typescript
Python

Frameworks:

Next.js
React Native
Express.js

Databases:

PostgreSQL
MongoDB

Backend:

Node.js
Django

PROFESSIONAL EXPERIENCE

Fullstack developer, ALEATEX

2025

- Contributed to building the MVP for the madc.ai platform.
- Developed microservices and implemented multiple external integrations to support transparency insights for project requirements.
- Worked across the full stack using modern TypeScript-based technologies.
- Tech Stack:** Technologies: TypeScript, React, PostgreSQL, Supabase, Kubernetes, gRPC

Junior Fullstack Developer, LEOCODE

2025

- Contributed to the development of the Human Body Universe web application (AnatoMy project).
- Implemented import of complex tree-structured metadata with associated GLB models into the database.
- Developed frontend features for rendering and mapping anatomical structures using 3D visualization.
- Implemented a role-based access control system.
- Tech Stack:** TypeScript, Next.js, Three.js, PostgreSQL, MinIO, Redis, REST API

Mobile Developer Intern, ITM Code

2024

- Developed a networking mobile application for the Kielce Technology Park.
- Implemented application features and UI components using React Native.
- Tech Stack:** TypeScript, React Native, GitLab, CSS

Backend Developer Intern, siudak.com

2024

- Developed backend features for the SelfExpo platform.
- Implemented functionality supporting self-service pavilion registration.
- Tech Stack:** Next.js, TypeScript, MongoDB, JWT, Jest, GitHub, REST API

EDUCATION

Computer Science - Information Systems

2026 - Present

Currently part-time studying at Kielce University of Technology

Data Engineering

2022 - 2026

I graduated from full-time studies with an engineering degree at Kielce University of Technology

ADDITIONAL INFORMATION

- Languages:** Polish, English
- AI Tools:** Claude Code, Cursor
- Methodologies:** Agile
